## Land Conservation

February 25, 2022 | 10:30 AM – 12 NN | Zoom link: <https://bit.ly/3rDYGXH>

Alex Pfaff is a Professor of Public Policy, Economics and the Environment at Duke University. He studies how economic development affects, and is affected by, natural resources and the environment.

He focuses on the impacts of both conservation and development policies upon many choices by individuals and communities — which in turn affect land use, water quantity, water quality, air quality, human exposures, and the provision as well as the use of information.

**Janet Gil**

Program Director,  
Miami-Dade County  
Environmentally  
Endangered Lands (EEL)  
Program

Janet Gil is the Program Director for the Miami-Dade County Environmentally Endangered Lands (EEL) Program. Janet has represented and served as spokesperson of the EEL Program for over 5 years but managed several preserves as a Biologist in the decade prior to her tenure as Program Director.

She is responsible for multi-million-dollar trust funds that have supported the acquisition and management of over 27,000 acres of environmentally sensitive lands. Ms. Gil develops and implements land acquisition and environmental policies, departmental policies and procedures, operational initiatives, and establishes organizational goals and performance measures for the EEL Program.
